

Join Our Team: UI/UX Desktop Developer (.NET & WPF)

Location: Lincoln, Nebraska | Status: Full-Time | Work Environment: On-Site

At **MIPS**, we design software solutions that empower Nebraska's counties to better serve their communities. We're looking for a **UI/UX Desktop Developer** with strong expertise in **.NET (C#)** and **WPF** to craft modern, responsive, and intuitive desktop applications that support core functions like property assessment, payroll, and public records access.

As part of our product development team, you'll transform functional requirements into elegant user experiences. This is a highly creative and technical role where you'll collaborate closely with product managers, designers, and back-end developers to bring clean, consistent, and purposeful interfaces to life.

Key Responsibilities

- ✓ Design, develop, and maintain responsive and visually compelling desktop applications using **.NET (C#)** and **Windows Presentation Foundation (WPF)**
- ✓ Create seamless and intuitive **user experiences** that align with UI/UX best practices
- ✓ Work closely with cross-functional teams to translate functional requirements into thoughtful interface solutions
- ✓ Apply the **MVVM architectural pattern**, including strong use of **XAML** for interface design and data binding
- ✓ Conduct user testing, gather feedback, and iterate on UI/UX improvements
- ✓ Develop reusable UI components to maintain consistency across product lines
- ✓ Troubleshoot and resolve interface-related performance or usability issues
- ✓ Stay current with evolving desktop UI/UX trends, tools, and methodologies

Required Skills & Qualifications

- Proficiency in **.NET (C#)** and **WPF** application development
- Strong knowledge of **XAML**, **MVVM**, and **data binding principles**
- Familiarity with **UI/UX design tools**, wireframing, and user-centered design methodologies
- Ability to build modern, user-friendly desktop interfaces that balance function and aesthetics
- Excellent attention to detail and a commitment to design consistency

- Strong debugging skills and the ability to work through complex interface issues
 - Effective communication and collaboration skills in cross-disciplinary teams
-

Preferred Skills

- Experience integrating desktop UIs with backend APIs and services
 - Knowledge of **accessibility standards** and **usability best practices**
 - Familiarity with enterprise software systems such as payroll, accounts payable, or assessment tools
-

What We Offer

- Competitive compensation with performance-based incentives
 - **On-site collaboration** with a forward-thinking product development team
 - Professional development opportunities and exposure to public-sector innovation
 - A culture of creativity, collaboration, and purpose
 - Health benefits, paid time off, and 401(k) retirement plan
-

If you're passionate about crafting intuitive, beautiful, and functional desktop applications—we'd love to meet you. Join **MIPS** and help modernize how counties serve the public.
